EIGHTEENTH ANNIVERSARY
ANNOUNCEMENT

IGHTEEN years ago we commenced business at 146 West 23d Street and after nine years moved to our present more commodious quarters at 166 West 23d Street, to enable us to handle our increased business.

In January, 1917, we incorporated, thereby giving our employees an interest in the welfare of our business.

We thank our numerous patrons and friends for their continued confidence in our goods, which has enabled us to be proud of their patronage, and we hope still to maintain the standard and quality of our goods in the future as in the past.

Our patrons will always find courteous treatment from our fellow workers who have so greatly aided us in the expansion of our business.

ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

PARCELS POST

We deliver free by Parcels Post all seeds, except Beans, Corn, Peas, Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

We deliver free by mail all flower and vegetable seeds by the packet, ounce and quarter pound.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

Owing to the scarcity of all Bags we are compelled to charge them at cost and credit will be given when returned, charges prepaid, if in good condition.

GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that anyone who applies to us fails of getting the right party. No fee.

SPECIAL NOTICE

PRICES

The prices published in this Catalogue are subject to market changes without notice.

Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

MARSHALL'S VEGETABLE SEEDS

WITH GENERAL DIRECTIONS FOR CULTIVATION

W. E. MARSHALL & CO., INC., give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich, sandy loam is best adapted for this plant. The seed should be sown in drills 1½ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 25c., ¼ oz. 60c., oz. $1.00.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. $2.50, 100 $20.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 30c., pk. $1.75.

ASPARAGUS

One ounce will produce about 200 plants.

Sow in Autumn or in Spring as soon as the soil is in good working condition. At one or two years transplant to permanent beds.

Conover's Colossal. Very prolific and tender ........................................... $0.05 $0.10 $0.30

Palmetto. A fine variety, producing large, green Asparagus ............................. 0.5 10 .30

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture.—The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots, and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top-dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

DWARF SHELL BEANS

Sow in drills 2 feet apart as soon as warm weather has set in; soil should be light and rich; covering about 2 inches.

POLE, OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

Carpenteria Lima. The beans have a greenish tint; vines vigorous and very productive. A perfect Lima bean

BEAN POLES. Cedar wood, 8 to 9 ft. long, pointed to drive in the ground, $2.75 per doz., $20.00 per 100.

BEET

One ounce will sow 150 feet of drill.

For early supply sow as soon as the ground is in working order, in drills 1 foot apart and 2 inches deep. For main crop sow the second week in May, and for Winter use sow in June. When the plants are well forward thin out to about 9 inches apart. The young Beets, with their tops, pulled out of the row, are excellent used as Spinach.

Early Blood Turnip. The leading early sort; also fine for late use.

CELERY
One ounce will sow about 300 feet of row and produce about 5000 plants.
Sow in the open border early in April, in rich ground. When the plants are 3 inches high transplant 4 inches apart into temporary beds of soft, rich soil until they acquire sufficient strength for planting out. Plant in rows 3 feet apart and set 8 inches apart in the rows. About the middle of August earthing up is necessary for blanching and whitening of that which is wanted for early use.

CORN SALAD, OR FETTICUS

One ounce will sow 150 feet of drill.

Sow in September in drills 8 inches apart, covering the seeds lightly, and protect from frost by light covering of hay and litter. The seed may be sown in Spring.
Large-Seeded. The most popular variety grown. Pkt. 10c., oz. 25c., ¼ lb. 75c., lb. $2.00.

CORN, SWEET

One quart will plant 200 hills.

Plant in hills 3 feet apart each way, dropping five or six kernels in each hill, or in rows 3 feet apart, and the plants thinned out to 8 or 9 inches in the row. From May until the middle of July a succession planting can be made every two or three weeks, and a continued supply can be had until frost kills the plants.

**LEEK**

One ounce will sow 200 feet of drill.

The Leek is very hardy and easily cultivated; it succeeds best in light but well enriched soil. Sow as early in the Spring as practicable, in drills 1 inch deep and 1 foot apart. When 6 to 8 inches high transplant in rows 10 inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

Marshall's Giant. The largest and best Leek for exhibition. Highly recommended as the choicest variety in cultivation, of a mild and delicious flavor.

**LETTUCE**

One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible, barely covering the seed. If the hotbed is used let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the beds be about 4 inches apart. As they increase in size thin them out or they will become weak. Plant for late use in a cool, partially shaded place in rich soil.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn into pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

Pure Culture Prolific Direct Bricks. An American-made spawn which produces large crops of large size, deep cream, and excellent quality Mushrooms. Per brick 40c., 10 bricks for $3.50, 50 bricks $15.00.

MUSTARD

One ounce will sow 100 feet of drill.

For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the Spring, in drills from 8 to 12 inches apart.

OKRA, OR GUMBO

One ounce will plant 100 hills.

This plant is extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Sow about the middle of May in drills 3 feet apart and thin out the plants to 1 foot apart.

Pkt. Oz. 1/4 lb. Lb.

White Velvet. Tender white pods; smooth and velvety in appearance. 10 .20 .40 1.00

ONION SETS

Three quarts will plant 100 yards of row.

Onion Sets should be planted early in the Spring in rows 12 inches apart, placing the sets 4 inches apart in the row. When raised from sets the Onion can be used in the green state in June, or they will be matured by July.

**ONION**

One ounce will sow 200 feet of drill. 4 to 5 pounds to the acre.

Sow in drills 1 foot apart and cover about one-third of an inch, treading or rolling after sowing so that the hot, dry atmosphere may not destroy the sprouting seed. When 3 inches high thin to 2 inches apart. Stir the ground freely without disturbing the young plants and keep free from weeds.

**PARSNIP**

One ounce will sow 200 feet of drill.

Sow Parsnip seed as early in Spring as the weather will permit, in drills from 15 to 18 inches apart, covering with fine soil to the depth of half an inch. The soil should be rich and deep; manured if possible, the previous Autumn. Thin out the young plants to about 6 inches apart and keep the surface of the ground open and free from weeds. It is perfectly hardy and may remain in the ground through the Winter. Indeed, the fine sugary flavor is only perfected by a severe frost.

PEAS

One quart will plant about 150 feet of drill.

Peas mature earliest in a light rich soil; for general crop a rich loam is the best. When grown in gardens sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as early as the ground can be worked in February or March and continue for a succession every two weeks until July.

POTATOES
GROWN EXPRESSLY FOR SEED IN MAINE

Peck will plant 100 ft. row. Ten bushels cut tubers will plant 1 acre.

The Potato, like the robust-growing vegetable, can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in—the latter in most cases being preferable. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Beauty of Hebron. Slightly flesh colored skin, with pure white flesh; very productive and Bush. Bag of the finest quality.................................................$4.50 $10.00
Bovee. Extra early; fine quality; flesh white.........................................................4.50 10.00
Dibble’s Russet. This is the best main crop Potato in cultivation. The tubers are round to oblong in shape, good size, white flesh and covered with a russet skin. The quality when cooked cannot be excelled. It also has great disease-resistant and blight-proof properties.............................................................4.50 10.00
Early Rose. Very early; fine quality; very productive, skin shaded rose color..................4.50 10.00
Gold Coin. Very productive, fine table quality; flesh pure white and cooks very dry........4.50 10.00
Green Mountain. Oval shape; white skin and flesh; heavy yielder; good for Winter use...4.50 10.00
Irish Cobbler. One of the best extra early varieties; very large white and heavy copper; of excellent quality.................................................................4.50 10.00
Sir Walter Raleigh. Very large oblong tubers, uniform in shape..................................4.50 10.00

At the time of going to press with this Catalogue the Potato market is so unsettled that prices are subject to change.

We request those desiring Seed Potatoes to write for prices on the quantities wanted and we will give quotations by mail.

Unpriced orders will be filled at the prevailing market prices at time of shipment.

Potatoes are forwarded by express or freight as directed, purchaser paying charges.

POTATOES FROM SEED

Growing new and distinct Seedling Potatoes from the seed ball is interesting. They will produce new kinds, shapes, sizes and colors. All valuable new varieties are produced from just such seeds. Pkt. 15c.
PUMPKIN
One ounce will plant 50 hills.

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

RADISH
One ounce of seed will sow 150 feet of drill.

Radishes require a light, loamy soil, moderately fertile, which should be deeply dug and well pulverized. The situation should be warm and sheltered. For an early supply sow in January or February in hotbeds, keeping well ventilated. In May they may be sown out-of-doors. Successive sowings should be made every two weeks. Radishes to be crisp and tender should make a rapid growth.

Winter varieties should be sown in July and August.

MILLET

Golden. Very large crop, though not so early as Hungarian. Grows 3 to 5 ft. high. Requires good soil. Sow 1 bushel to the acre, 48 lbs. to the bushel. $0.15 $4.50 $9.00

Hungarian. A favorite Summer forage crop. Sow in June, can be cut in about 60 days. Will yield two to three tons of hay per acre. Withstands heat and drouth well. Plant about 3 pecks to 1 bushel per acre, 48 lbs. to the bushel. .15 4.00 8.00

Japanese. Some times called Barnyard Millet. Grows very tall, 6 to 7 feet; makes valuable forage and is the greatest yielder of all the Millets. Sow about 15 lbs. per acre, 35 lbs. to the bushel. $0.20 4.00 11.00

OATS

Sow 2 to 3 bushels to the acre, 32 lbs. to the bushel.

Storm King. The heads measure from 8 to 10 in. and the kernels are of immense size, thick, plump and heavy. It is very early, has great length of straw, producing 70 bushels per acre. We can safely say it is the greatest producer of any variety of Oats grown in this country. Bus. $2.75.

White Tartar. A remarkably handsome and perfect white oat, extremely early, in fact, the earliest variety in cultivation. It is an enormous cropper. The straw is long, very strong, and holds up well. The heads are large and well filled. Pk. 50c., bu: $2.50, 10 bus. or over, $2.35 per bus.

Golden Rain Swedish White Oat. This variety has the highest record of any white oat on poor land. The grain though relatively small is broad, very full, extremely thin skinned, and of a light yellow color. The yield is remarkably good and it is very early. The straw is long and will stand up in the roughest weather. Imported seed. Bush. $5.00.

Wasa White Swedish Oat. The highest record of any White Oat on good oat land. It yields a wonderfully heavy crop, the straw is of medium height, and very strong. The grain is short, plump, thin skinned and pearly white. Ripens medium early. Imported seed. Bus. $5.00.

PEAS

Canada Field. Valuable for cattle feeding. Also used for ensilage. Sown broadcast in the Spring at the rate of two bushels to the acre. Pk. $1.50, bus. $5.00.

Cow Peas, Clay. This variety is of extra strong growth and specially adapted for sowing in Northern States. A first-class green fertilizer; does well on all sorts of soils and under adverse conditions. The feeding value, also, whether in a green or cured state, cannot be over-estimated. Sow 2 bushels per acre, 60 lbs. per bushel. Bus. $6.00.

Cow Peas, Whippoorwill. A very early maturing variety of upright or bush growth. Bus. $6.00.

RAPE

Dwarf Essex. Fine for sheep pasture; valuable as a soil enricher. Plant in June or July in drills at the rate of 3 lbs. per acre, broadcast 5 lbs. per acre. Can be planted alone or with other forage crops. Lb. 25e., 100 lbs. $15.00.

Prices on all Farm Seeds are subject to market fluctuations.
RYE
For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel.
Spring. This is excellent for a catch-crop, as it may be sown somewhat later than other grains and produces an abundance of green feed in the Summer season. Giant Winter. This variety is fast gaining in popularity as a cover crop and produces an abundant crop of early green feed. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1.

SORGHUM
Early Amber Sugar Cane. The earliest and most productive variety. Height, 10 to 12 ft. For ensilage or fodder it possesses good qualities; stock of all kinds relish it. Sow 7 lbs. in drills, or 15 lbs. broadcast, to acre. $0.15 $12.00
Kaffir Corn (White). Excellent forage for horses and cattle, and excellent feed for poultry. Sow 4 to 5 lbs. per acre. 15c. 12.00

SUDAN GRASS
A new forage crop of immense value. Sudan Grass is strictly an annual and dies each year like Millet and must be seeded again each Spring. Sudan Grass reaches a height of from 7 to 9 feet, yet the stems are small and tender. The plant stools wonderfully and produces under favorable conditions as many as 100 stalks from a single root. The seed should not be planted until the soil has become warm in the Spring and preferably on warm, light soil. Sow in drills 2 to 3 lbs. per acre; broadcasted, 16 to 24 lbs. per acre. Cut just after bloom, so ample time may be had for second growth. Lb. 20¢, 100 lbs. $10.00

SUNFLOWER
Mammoth Russian. Very productive, large heads with large seeds. Valuable for poultry, 5 lbs. will plant 1 acre. Lb. 25¢, 25 lbs. $4.00. 100 lbs. $15.00.

VETCHES, OR TARES
Spring Vetches (Vicia sativa). Closely associated with Peas in character. Highly valuable for soil- ing or for green manuring. Sometimes grown with Oats for mowing and feeding to stock. Use 40 to 60 lbs. to the acre. Sow in Spring while ground is cool and moist, or in early Autumn. Lb. 15¢, 100 lbs. $1.20.
Winter Vetches (Vicia villosa). Also called Sand Vetch, or Hairy Vetch. Recommended for Fall sowing with Rye, as in many localities in the North it is hardy, remaining green all Winter. A valuable food for stock in early Spring. Use 30 to 50 lbs. per acre. Lb. 25¢, 100 lbs. $2.00.

WHEAT
The seed Wheat we offer is grown in Pennsylvania by a very reliable grower, especially for seed purposes. Sow 1½ bushels to the acre.
Marquis Spring. A very early beardless Wheat that succeeds well in the East, producing larger yields than any other kind. Sow as early as possible about 2½ bushels per acre. Bus. $4.00.
Golden Wave. A grand large red grain, bearded variety. Market price
Red Wave. Has long, well-filled heads and large, heavy red grain. The heads are beardless and straw long and yellow. Market price
Prices on all Farm Seeds are subject to market fluctuations.
GRASS SEEDS

For Pasture, Mowing and Lawn

Prices subject to market changes.

Canadian Blue Grass (Poa compressa). A more rapid grower than Kentucky Blue Grass and equally good for pasture, but not as suitable for lawns. This is an excellent pasture grass for poor, dry land and should be more largely used for this purpose. .................................................. 14 lbs. $0.55 7.00 50.00

Creeping Bent Grass (Agrostis stolonifera). Desirable for mixing with other lawn or pasture grasses. ................................................................. 15 lbs. 2.00 27.00 175.00

Crested Dogstail (Cynosurus cristatus). Roots fibrous and tufted perennial. This is a most valuable permanent pasture grass. For parks this grass is well suited because of its fine, close growth and pleasant green color. .................................................. 20 lbs. 1.00 18.00 80.00

English Ryegrass (Lolium perenne). Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Sow 60 lbs. to acre. .......................... 24 lbs. .25 .425 17.00

English Ryegrass (Pacey's). A carefully selected, short-seeded, dwarf-growing strain, suitable for lawns. .................................................. 24 lbs. .25 5.00 20.00

Fine-Leafed Fescue (Festuca ovina teuquifolia). Suitable for lawns and putting greens. ................................................................. 16 lbs. 1.50 23.00

Hard Fescue (Festuca duriuscula). A slender, densely tufted perennial grass, 1 to 2 ft. high. Thrives on dry, sandy soils. .................................................. 14 lbs. .70 8.50 60.00

Italian Rye Grass (Lolium italicum). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass. .......................... 22 lbs. .20 4.00 17.00

Kentucky Blue Grass (Poa pratensis). A very widely distributed species, and without a rival as a pasture grass. Being of perennial habit, it will, with establishment, last indefinitely. One of the finest varieties. For use in lawns, owing to the thick growth of sod. .................................................. 14 lbs. .80 10.00 70.00

Meadow Fescue, or English Blue Grass (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Festuca grasses. This grass is well adapted for permanent pastures. It grows rapidly in rich and rather moist soils and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses. .................................................. 15 lbs. .50 7.50 40.00

Meadow Foxtail (Alopecurus pratensis). One of the best grasses for permanent pasture, and should always form a fair proportion of the mixtures for that purpose. Thrives best on a rich, strong soil. .................. 10 lbs. 1.25 12.00

New Zealand Fescue (Festuca rubra). Resists extreme drought; thrives on inferior soils, gravelly banks and exposed hills. 25 lbs. to acre. ............. 14 lbs. 1.25 17.00

Orchard Grass. A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. It prefers a moderately dry soil with considerable sandy material. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre ............. 14 lbs. .40 5.00 35.00

Red Top (Agrostis vulgaris). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, and meadow lands, and those that are not rich enough for Timothy or Clover; its does not thrive on sandy or leahey soils, but will adapt itself to a wider range of soils than any other grass. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover, or in a mixture with other grasses. .................. 14 lbs. .45 12.00 40.00

Red Top, Fancy Cleaned. Use 14 to 16 lbs. to acre. .................. 30 lbs. .45 12.00

Red Top, Unhulled. Use from 40 to 50 lbs. to the acre ............. 14 lbs. .30 3.25 22.00

Rhode Island Bent (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used for pastures and lawns. Soil and treatment same as for Red Top. .................. 14 lbs. Market price

Sheep Fescue (Festuca ovina). A small tufted, hardy grass, of value in mixture for lawns or dry soil. .......................... 14 lbs. .70 8.50 60.00

Tall Fescue (Festuca elatior). Used for pastures. .................. 22 lbs. 1.00 20.00 85.00

Tall Meadow Oat Grass (Avena elatior). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture on account of its early and late growth. .................. 10 lbs. .70 6.00 55.00

Timothy, or Herb Grass (Phleum pratense). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils, but succeeds best on moist loam and clay soils; and crops are subject to soil and climate. The most profitable crops are obtained the first and second seasons. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover .................. 45 lbs. .20 6.50 14.00

Wood Meadow Grass (Poa memoriais). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold. .................. 14 lbs. 1.75 21.00
MIXTURES FOR HAY AND PERMANENT PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.

PERMANENT PASTURE MIXTURE NO. 1. For cool and moist soils. Bus. (15 lbs.)
PERMANENT PASTURE MIXTURE NO. 2. For dry soils. Bus. (15 lbs.)
PERMANENT PASTURE MIXTURE NO. 3. For wet soils. Bus. (15 lbs.)
PERMANENT HAY MIXTURE NO. 4. For good, cool and moist soils. Bus. (15 lbs.)
PERMANENT HAY MIXTURE NO. 5. For high, dry soils. Bus. (15 lbs.)

Prices of any of the above Mixtures, 10 lbs. $4.00, 50 lbs. $17.50, 100 lbs. $35.00.

CLOVERS

Prices subject to market changes.

Alfalfa, or Lucerne (Medicago sativa). One of the most valuable forage plants. .......................... 20 lbs. $0.45 $21.00 $35.00
Alfalfa, Grimm. Much hardier than other variety .................................................... 20 lbs. 1.25 54.00 90.00
Alsike (Trifolium hybridum). The hardiest of all Clovers, can be cut several times in one season. Grows well on low, wet land .................................................. 10 lbs. .45 21.00 35.00
Crimson, or Scarlet Clover (Trifolium incarnatum). An annual variety producing large crops of green foliage .................................................. 20 lbs. .25 11.00 18.00
Mammoth Red, or Pea Vine. Grows much taller than Medium Red Clover. 10 lbs. .50 24.00 40.00
Medium Red (Trifolium pratense). This is the common Red Clover so largely grown throughout the country .................................................. 15 lbs. .45 21.50 35.00
Sweet Clover, Bokhara (Melilotus alba). Will grow on very poor soils; useful for ensilage and plowing under. Grows from 3 to 4 ft. high. Hulled seed .................................................. 15 lbs. .40 21.50 35.00
White Clover (Trifolium repens). The best variety for lawns; valuable in permanent pastures .................................................. 10 lbs. 1.00 50.00 80.00
Mixed Clover .................................................. 10 lbs. .55 27.00 45.00
MARTIN'S "SPECIAL" LAWN GRASS MIXTURE

MARTIN'S Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of intertwaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture contains highest grade recleaned seeds of Red Top, Kentucky Blue, Sheep's Fescue, Pacey's Rye, Fine-leaved Grass, and other varieties, no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

1 lb. will sow 20x20 feet (400 square feet); 5 lbs., 50x50 feet (2500 square feet); 20 lbs. 100x100 feet (10,000 square feet); 100 lbs., one acre.

Price: Lb. 60c., 5 lbs. $2.75, 20 lbs. $10.00, 100 lbs. $50.00.

MARTIN'S "CENTRAL PARK" LAWN GRASS

MARTIN'S Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

1 lb. will sow 20x20 feet (400 square feet); 5 lbs., 50x50 feet (2500 square feet); 20 lbs. 100x100 feet (10,000 square feet); 100 lbs., one acre.

Price: Lb. 50c., 5 lbs. $2.00, 20 lbs. $7.00, 100 lbs. $35.00.

MARTIN'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Lb. 60c., 5 lbs. $2.75, bu. 20 lbs. $10.00, 100 lbs. $50.00.

SPECIAL LAWN GRASS MIXTURE FOR SEASIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: Lb. 50c., 5 lbs. $2.00, 20 lbs. $7.00.
MARSHALL’S LAWN RESTORING GRASS SEED

A mixture of grasses suited to take firm hold and grow quickly on hard, worn out, or burned spots. The best time to resow them is very early in Spring, but seed may also be sown from September to October.

Price: Lb. 50c., 5 lbs. $2.00, bu. 20 lbs. $7.00.

MARSHALL’S TERRACE MIXTURE LAWN GRASS

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drouth and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Lb. 60c., 5 lbs. $2.50, bu. 20 lbs. $8.00.

PERMANENT GRASS MIXTURES FOR GOLF LINKS

MARSHALL’S PUTTING GREEN, or TENNIS COURT MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square.

Per lb. 70c., 5 lbs. $3.00, 25 lbs. $12.50, 100 lbs. $50.00.

MARSHALL’S FAIR GREEN MIXTURE

Marshall’s Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 100 lbs. per acre.

Price: 20 lbs. $8.00, 100 lbs. $40.00.
GENERAL LIST OF
Marshall’s Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND POUND RATE TO ANY POST OFFICE IN THE UNITED STATES.

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter, and thrive in the garden during the warm months.

### MARSHALL'S MATCHLESS SEEDS

#### NAME AND DESCRIPTION.

**Height in feet** | **Duration** | **Ounce** | **Pkt.**
--- | --- | --- | ---

**CINERARIA hybrid.** One of the most gorgeous colored flowering plants for either greenhouse or conservatory. Seeds should be sown in July, August or September.

**Marshall's Matchless Prize Mixed.** Every shade of blue, crimson, violet and pink, both in self-colors and with white edge or center. The flowers are often 3 inches in diameter and the plants of excellent habit.

**grandiflora, Matchless Dwarf Prize Mixed.** This strain is just as choice as above, but different in height.

**stelata, Blue Star Flowered.**

**stelata, Pink Star Flowered.**

**stelata, White Star Flowered.**

**stella hybrida, Mixed.** Tall pyramidal plants, bearing star-like flowers.

**CLARKIA.** This pretty and easily grown annual has been much improved in recent years, and the varieties offered below are fine seen as cut flowers in most of the large cities of Europe; they do well either in sun or shade.

**Brilliant.** Double salmon-scarlet flowers. 1/2 oz. 50 cts.

**Queen Mary.** Very bright rose carmine, double flowers. 1/2 oz. 50 cts.

**rosea flore plena.** Double rose. 1/2 oz. 25 cts.

**Salmon Queen.** Extra double salmon-pink. 1/2 oz. 25 cts.

**Scarlet Queen.** Fine double, brilliant salmon orange scarlet. 1/2 oz. 50 cts.

**White.** Very double, pure white flowers. 1/2 oz. 30 cts.

**Double Mixed.** All colors.

**CLEOME gigantea.** (Giant Spider Flower). Bright rosy-crimson flowers; adapted for large beds or borders. 1/2 oz. 55 cts.

**G. S.**

**CLEANTHUS Dampieri.** (Austrian Glory Pea). Scarlet flowers.

**CLERODENDRON Fallax.** Erect growing greenhouse plant, with large spikes of scarlet flowers.

**COBRA scandens.** Tender climber, larger, bell-shaped blue flower.

**White.** Large white, bell-like flowers. 1/2 oz. 60 cts.

**COCKSCOMB.** (See Celosia cristata).

**COLEUS, Marshall's Matchless Mixed.** Richly colored foliage plants.

**COLLINSIA.** Charming annual. Finest mixed.

**COLUMBINE.** (See Aquilegia).

**COLVOLVULUS, or Morning Glories.** (See also Morning Glory). Deservedly very popular, as they are of the most free-flowering and rapid-growing plants in cultivation, thriving in almost any situation.

**major, mixed colors.** Climbers of rapid growth.

**minor, or Bush Morning Glories.** Mixed colors.

**COREOPSIS.** Long stemmed, large, single flowers.

**grandiflora.** Large flowers of rich yellow. 1/4 oz. 25 cts.

**laceolata.** Yellow. 1/4 oz. 25 cts.

**CORN, Rainbow (Zea japonica variegata).** Variegated leaves, striped in green, white and yellow.

**H. A.**

**CORNFLOWER.** (See Centaurea cyanus).

**COSMOS.** This is one of our most useful and beautiful Autumn flowers. To get it in bloom early, seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being transplanted.

**Double Crested.** New varieties with semi-double flowers.

**Carmine Kine.** Bright red crested flowers. 1/2 oz. $1.00.

**Pink Beauty.** A lovely shade of pink, crested flower. 1/2 oz. $1.00.

**White Queen.** Pure white, crested flower. 1/2 oz. $1.00.

**Double Varieties.** Very fine, full, round double flowers.

**Double Crimson.** 1-2 oz. $1.00.

**Double Pink.** 1-2 oz. $1.00.

**Double White.** 1-2 oz. $1.00.

**Giant Early Flowering.** Crimson. 1/4 oz. 50 cts.

**Giant Early Flowering.** Pink. 1/4 oz. 50 cts.

**Giant Early Flowering (The Bride).** White, tinted pink.

**Giant Early Flowering.** White. 1/4 oz. 50 cts.

**Giant Early Flowering.** Mixed colors; compact, bushy growth.

**Giant Late Flowering.** Lady Lenox. Pink. 1/4 oz. 50 cts.

**Giant Late Flowering.** Lady Lenox. White. A pure white type of the popular Pink variety.

**Giant Late Flowering.** Red. 1/4 oz. 50 cts.

**Giant Late Flowering Mixed.** All shades. 1/4 oz. 35 cts.

**Klondyke.** Large flowered golden yellow. 1/4 oz. 50 cts.

PHILOX, Drummondii grandiflora. Improved large flowering strains of this
famous garden annual. It will grow and thrive in any kind of soil if given a
sunny position, but prefers a light, rich loam. Seed may be sown in the open
ground any time after danger from frost is past.

SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivaled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

MARSHALL’S SPENCER TYPE SWEET PEAS

The Spencer types of Sweet Peas are a great improvement over the large flowering varieties. For cutting and exhibition purposes they are indispensable. The following varieties are a selection of the many kinds of this class best adapted for general use.

SUMMER FLOWERING BULBS

AGAPANTHUS

*umbellatus* (Blue Lily of the Nile). A most desirable plant for outdoor decoration; planted in large pots or tubs on the lawn or piazza. Pot-grown plants. Each 50c., doz. $5.00.

*umbellatus albus*. White. Each 50c., doz. $5.00.

AMARYLLIS

They should be grown in rich, sandy loam, with good drainage, and require abundant moisture when growing; but at their season of rest water should be given sparingly.

*formosissima* (Jacobean Lily). Brilliant scarlet. Each 35c., doz. $3.50.

*Hippastrum, Veitch's and Ker's New Hybrids*. The finest race of Amaryllis in cultivation. Each $1.50, doz. $15.00.

*Johnsonii*. Crimson, striped with white. Extra large bulbs. Each $1.00, doz. $10.00.

*Regina*. Soft light scarlet with white center and throat. Each 50c., doz. $5.00.

*vittata Hybrids*. Mixed colors. Each $1.00, doz. $10.00.

BEGONIAS

Splendid pot plants for the house or greenhouse, and especially valuable for bedding, flowering in the greatest profusion throughout the Summer. For bedding they should be started in hotbed in March and April.

CALLAS (Richardia)

*aurata* (Lemon Calla). Flowers light lemon-yellow, with a jet black center. Very showy. Each $0.25, doz. $2.50, $18.00.

*Elliottiana*. Flowers are large, rich, dark golden yellow, often 4 to 5 inches across the mouth. Leaves are beautifully spotted with white. Each $0.50, doz. 5.00, $35.00.

*Godfrey Everblooming*. The finest white variety; blooms from very small plants continuously. Pot-grown plants. Each 25, doz. 2.50, $20.00.

CINNAMON VINE

*DIOSCOREA Batatas*. A rapid growing Summer climber, with bright green, glossy foliage and spikes of Cinnamon-scented white flowers. Each 50c., doz. $0.90, $5.00.
HYACINTHUS CANDICANS (Cape Hyacinth)

A snow white, Summer flowering Hyacinth, growing 3 to 5 feet in height, gracefully surmounted from twenty to thirty pure white, bell shaped flowers. Each 10c., doz. $1.00, 100 $6.00.

ISMENE. Calathina Grandiflora

The flowers are very large, like an Amaryllis, novel in form and snow white in color. Each 15c., doz. $1.50, 100 $10.00.

LILIES

When grown in the border or open ground they should remain undisturbed for years, frequent removals being injurious. In the Autumn give the bulbs a heavy mulching of leaves; coarse manure or boughs will prove highly beneficial. Plant all Lilies at least 6 inches deep, as early as possible in the Spring.

auratum (Golden Banded Lily). The grandest of all hardy Lilies. Each Doz. 100

GLADIOLUS FOR LATE PLANTING

Gladiolus can be had in flower in late September and October if the bulbs are retarded in cold storage. We are prepared to place in cold storage any varieties if ordered before the end of April and ship at any date required for later planting.
GLADIOLUS

There are no other Summer flowering bulbs so satisfactory, needing so little attention and thriving so well in almost any ordinary soil as the Gladiolus. Set the bulbs from 3 to 6 inches apart in rows, or for massing 6 inches apart, and about 4 inches deep.

Our selection of varieties has been made from many and includes all those of exceptional merit and a wide range of colors.

Hardy Perennial Plants
For Permanent Planting in Open Borders

Herbaceous plants should be used where a constant supply of flowers is desired, for, out of the large lists of herbaceous or perennial plants, such varieties may be selected as begin to flower very early, others that are almost continuous bloomers and some that continue to bloom even after frost sets in.

The approximate height of the Hardy Perennials in this catalogue is represented in feet and inches and the flowering periods are taken in the vicinity of New York.

Anchusa. Strong spikes of large, dark blue flowers. 2 to 3 ft. Sept., Oct.

Wilsonii. A tall variety from China, with violet-blue flowers. 5 to 6 ft. Sept.

All Aconitums, 35c. each, $3.00 for 10.

Agrostemma. See Lychinis.

Alyssum saxatile compactum (Rock Madwort, Golden Tuft). Compact masses of yellow flowers in early Spring. 1 ft. April, May.

Anchusa Italica, Dropmore. Large, gentian-blue flowers. 4 to 5 ft. May-July.

Anemone (Windflower). Japanese Anemones are among the best Autumn Flowering plants. 2 to 3 ft. Sept., Oct.

Queen Charlotte. Semi-double, pink flowers.

Whirlwind. Semi-double, white.

Anthemis montana (Marguerite). One of the most satisfactory perennials; flowers creamy white. 2 ft. June-Oct.

Aquilegia coerulca (Rocky Mountain Columbine). Large, blue and white, long spurred flowers.

Chrysantha (Golden Spurred Columbine). Flowers fragrant, yellow. 2 to 3 in. across.

Arabis alpina (Rock Cress). Adapted for rock gardens; pure white. 5 in. April, May.

—flor-pleno. A double form of the preceding.

Artemisia Abrotanum (Southernwood, Old Man). Usually grown for its handsome, pleasant-scented leaves. 2 to 3 ft.

Lactiflora. Large, branching panicles of sweetly scented, creamy white flowers. 3 to 4 ft. Aug., Sept.

Asperula odorata (Sweet Woodruff, Waldmeister). A sweet-scented herb; white. 6 to 8 in. May, June.

Aster (Michaelmas Daisy, Starwort).

Novo-angelicus Lil Fardel. Flowers large, rich, clear pink. 4 to 5 ft. Aug., Sept.

Tataricus. One of the tallest and latest-flowering Asters. Bluish violet. 5 to 6 ft. Oct.

White Queen. One of the best white Asters. 4 ft. Sept.

Aubrietia deltoidea. Fine for rockeries; dark violet. 6 in. April and May.

Baptisia Australis (False Indigo). Has racemes of upine-like flowers, dark blue in color. 3 to 4 ft. May-July.

Bocconia cordata (Plume Poppy). Creamy white flowers. 6 to 8 ft. July, Aug.

All plants on this page, except where noted, 25c. each, $2.20 for 10.
CAMPANULA (Bellflower). These are among the most important of hardy plants.

—alba. A white form of the above.

glomerata. Globular, dark blue flowers. 1½ ft. June, July.

Medium (Canterbury Bells). In blue, rose or white. 2–2 ½ ft. June.

calyxanthes (Cup-and-Saucer Canterbury Bells). In blue, blue, rose and white.

persicifolia (Peach-leaved Bellflower). Large, cup-shaped, blue flowers. 2 ft. June, July.

—alba grandiflora. White.

slightly A white form of the above.

CARYOPTERIS incana, Mastacanthus (Blue Spirea). Lavender-colored flowers. 3 to 4 ft. Sept., Oct.

—alba. A fine white form of the above.

CERASITIUM tomentosum (Snow-in-Summer). Bright, silvery foliage, with white flowers. 6 in. May, June.

CHRYSANTHEMUMS, Hardy. These make a grand show late in the Fall; all colors. See page 52 for list of varieties. 2 to 3 ft. Sept.–Oct. 20. each, $2.00 for doz.

ARCTIUM (Arctic Daisy). Multitudes of white, single, ragged flowers. 2 ft. wide. 12 to 18 in. Sept.–Nov.

maximum Shasta Daisy. Large white flowers; blooms profusely all Summer.

FRUIT TREES

Planting.—Make the holes large enough to admit the roots without cramping or bending, and deep enough to set the trees to their natural depth. Fine surface soil should be used for covering the roots, and this should be carefully mixed among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Never use manure in contact with the roots.

TARRED FELT DISKS
(Sterlingworth)

For protecting Cabbage and Cauliflower plants, when first set out, against root maggot. Made the right shape of special non-curling material and are free from imperfections in which the Maggot Fly might find a place to deposit eggs. Recommended by all the Agricultural Experiment Stations. 100 50c., 1000 $3.00.
ADJUSTABLE GARDEN CULTIVATOR

The most useful hand garden tool on the market.

It will pull out the weeds, pulverize the ground thoroughly, leaving it level. It will work between the rows, or the center shovel can be removed and straddle the row if desired. It is adjustable in width by sliding the top plate. It is the lightest, weighing but 3 lbs. complete with long handle. The blades are forged out of a solid steel rod. Price, $1.25.

PULL-EASY CULTIVATOR

This adjustable cultivator can be adjusted to fit rows of any width from 7 to 18 in. The middle tooth can be instantly removed to straddle the row. Furnished with a 4½ ft. wood handle. Each $1.25.

THE PULL-EASY ROCKER HOE

The two-edged, keen blade of this hoe cuts on both the forward and backward motion. The socket casting has side stops which limit the oscillating movement of the blade, keeping it at just the right angle under the surface to cut properly. Made with a 5-inch blade and 4½ foot handle. Each $1.00.

WINDOW BOXES—SELF-WATERING

Made with heavy metal, ornamented with a stamped design. They require water only every two weeks and will not leak. All sizes are 8 in. high and 9½ in. wide.

SMOOTHING AND LEVELING HARROW

With this tool every field can be made as smooth as a floor and the soil pulverized fine enough for a flower bed—makes a most perfect Onion bed. This harrow is also a great road maker. One man, with team, can make a perfect trotting track of any road. It is adjustable with a lever, by which the entire action is controlled by the driver, and he can remove at will all the earth possible for the team to haul, taking it from hills or uneven places and putting it into hollows to level up the field.

One-horse, 6 ft., $40.00; two-horse, 8 ft., $45.00.

HAND CORN PLANTERS

The “Segment” is light, strong, accurate and withstand the cheapest and most up-to-date planter on the market. Price, $2.50.

POST HOLE DIGGER

The blades are 9 in. long and the handles 5 ft. long. Price, $2.50.

GARDENER’S HARROW

Designed for one horse, convenient to handle and get around garden plots, etc.

PORTABLE REFUSE BURNERS

A portable steel furnace for the rapid and convenient destruction of all leaves, refuse and waste matter. In reality a two-wheeled hand cart (for which purpose it can also be used), made of strong steel angle iron and heavy steel netting, which is fire-proof and guaranteed not to burn out. Is fitted with broad-tired wheels, which enable it to be pulled along with the cleaning up squad on lawns or soft ground without injury. A strong steel pan is fitted under the axle, which catches all the fire and ashes as they fall through the bottom. This pan can be easily emptied as needed.

Against the cost of hauling the leaves and rubbish to a convenient spot for burning, the leaf burner will pay for itself twice over in one season.

BALL CELERY BLEACHER

The home grower and private gardener will find this an ideal system of bleaching Celery—handy, neat and just the thing to bleach a few stalks every few days as wanted.

It only takes a week or ten days after putting on these bleachers when your Celery will be a beautiful white, and all ready for the table. No banking with soil, no hunting up boards, and it produces better results on early Celery. The same bleachers can be used over and over again the same season.

Price of Bleachers, 6½x13in. 60 c. per doz., $4.00 per 100, $35.00 per 1000.

The Ball Lightning Celery Handler, Spring Brass, $4.00. Tin, $2.00 each.

CONTINUOUS RING CARNATION SUPPORT

This is the best Carnation Support for private or commercial growers. They are made with galvanized wire. For rows of 3, 4 or 5 plants two upright stakes are used and rows of 6 or 7 plants, three upright stakes. Each row has three rings for each plant which are adjustable to five different heights. To make the stakes rigid, straining wire should be used the full length of the bench. Full directions are sent with each order for setting up.

When ordering, kindly state the total number of Plants to be supported and the number of plants in each short row crosswise of the bench or send sketch of bench plan.

Supports for 3, 4 or 5 plants to row Doz. $1.00, 100 $5.00.

Supports for 6 or 7 plants to row. Doz. $1.00, 100 $6.00.

14 in. $12.50  16 in. $13.00  18 in. $13.50

THE "CLIPPER" MOWER

The cut shows a perspective view of the "Clipper" Mower. In the first place you will observe the cutter bar is directly in front of the wheels. The wheels travel over ground where the grass is cut, never rolling down the standing grass with the wheels, as other lawn mowers do. The small gauge wheels at the side are to gauge the height you wish to cut the grass.

Net prices: 15 inches, $10.50; 18 inches, $12.50; 21 inches, $14.50.

Prices of all Lawn Mowers are subject to change.
MOTO-MOWER

The Moto-Mower is strongly built of best material, guaranteed against defects in material and workmanship. Will cut lawns around trees, in nooks and corners, also terraces. It has no gears or clutches to get out of order. Burns one-eighth gallon of gas per hour. Weight, 160 pounds. Power, one horse, two cycle, air cooled motor. Cut 27 inches.

Price, $275.00. F. O. B., East Orange, N. J.
Grass Catchers, $7.50.

COLDWELL’S COMBINATION ROLLER AND MOTOR LAWN MOWER

Simplicity more than anything else has been sought in these models. Mechanical experience is not necessary to operate them and they can be cared for by anyone.

In using these machines you simply have to guide the mower, negotiating any grade that a horse-mower can be used on, and running a keen 30-inch or 35-inch cutter over 6 or 8 acres per day. Model "H" weighs 900 lbs. Model "G" (same type), 35-inch cut, weight 1000 lbs.

The operating handles are also used for raising and lowering the cutter unit over obstacles.

Model G, $475.00. F. O. B., Newburgh, N. Y.
Model H, $425.00. F. O. B., Newburgh, N. Y.

IDEAL JUNIOR POWER LAWN MOWER

In the Ideal Junior outfit are embodied all the principles for the correct application of power to the mowing of lawns. It is of the same general construction as the Ideal Model except that it has a 22-inch cut and is lighter weight. The drive rollers are corrugated to prevent sliding; speed three miles per hour; weight, 325 lbs.

THE IDEAL TRACTOR LAWN MOWER

The Ideal Lawn Mower is built with as few parts as possible, is simple in construction and can be depended on to give good work with minimum expense. Width of cut, 30 inches. Weight, 550 lbs.

TOWNSEND’S TRIPLEX HORSE LAWN MOWER

The Triplex Mower consists of three mowers yoked together, two abreast in front, and one in the rear, thus cutting a swath 88 inches wide.

One man and one horse, with a Triplex, will cut more grass in a day than with three ordinary horse mowers. Ask for catalogue with full particulars. Price, $400.00 net. F. O. B. Bloomfield, N. J.

THE SHAWNEE TRIPLE "SULKY" MOWER

The Shawnee Mower combines the work of three mowers in one, cutting 7 feet wide or as a sulky only 30 inches. The Spring arrangements permit it to cut long or rough grass any desired length. Descriptive circular sent on request.

Price net, $350.00. Extra unit, ordered with mower, $90.00. Extra unit ordered separate, $100.00.

All Lawn Mower prices are subject to change without notice.
PENNSYLVANIA
LAWN CLEANER

A revolving fan with metal teeth creates an air current which carries into the canvas baskets all leaves, dead grass, stone, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by lawn mower. It combines strength and durability with light construction. 24 inches wide. $35.00. 36 inches wide, $50.00.

GRASS SOD AND CEMENT
TAMPERS

Useful for tamplng down sod and uneven spots on Lawns, Tennis Courts and Golf Grounds. Made of iron, with heavy wooden handle.
Square Pattern. Size 6 in. Weight 12 lbs. Each $2.00. Size 8 in. Weight 17 lbs. Each $2.75

“ADJUSTO”
PLANT SUPPORT

The “Adjusto” is a very simple, unbreakable, practical and cheap support which will last a lifetime.

It is adjusted in a “jiffy” to any height, to conform to the plant’s growth. It is indispensable for Tomatoes, Roses, Hydrangeas and Dahlias.

The stake is made of hard wood having a protecting coat of green paint; the heavy spring wire is also painted green and so will not rust.

THE OSCILLATING LAWN AND GARDEN IRRIGATOR

Five-foot Oscillating Sprinkler

The Oscillating Irrigator attached to garden hose with ordinary water pressure will automatically irrigate the entire surface with a fine dense, rain-like spray 30 feet on either or both sides, covering a rectangular area 60 feet in width the entire length of the machine. Can be adjusted to water only one side with any length of stroke by the turning of two thumb screws. Gears inclosed and all corrodbale parts made of brass.

The Oscillating Irrigator is strongly constructed, and does not get out of order. Complete with 3/4-in. or 1-in. hose connection. 5-ft. sprinklers, $10.00, 10-ft. $15.00, 15-ft. $25.00.

TURBO IRRIGATOR HEAD

The Turbo will thoroughly and evenly distribute the water in a form like fine rain, without injury to the finest turf, over a circular area 85 to 100 feet in diameter. It oscillates and rotates, breaking up the spray into a most attractive and effective manner. From one position it will entirely water a putting green, eliminating the usual labor required to move the ordinary sprinklers. Made of brass, it will give unusual service. Minimum pressure required, 30 pounds.

Complete, with tripod collapsible stand and connection for 3/4-in. or 1-in. hose. Price, $15.00.

THE DAYTON ROTARY SPRINKLER

The Dayton Sprinkler is the most practical, durable and efficient sprinkler devised for watering lawns or gardens. It sprinkles in a circle from a 3-foot to a 40-foot radius, it operates with a 15-lb. up pressure of water and can be adjusted to any kind of a stream. All parts made with brass, aluminum and silver. Connections for 3/4-in. hose. Each $7.00.

THE KIRKE SYSTEM

FERTILIZE WHILE WATERING, OR DESTROY INSECTS

Kirke Feeder for inserting the cartridge

The Kirke Feeder applies the fertilizer while watering, and feeds the grass or garden with high-grade, immediately available, concentrated plant food. It will last a lifetime, and can be used both for Kirke Fertilizer and insecticide cartridges. The cartridges of concentrated fertilizer for the lawn and garden, and the nicotine cartridges for the destruction of soft-bodied insects, dissolve in as much water as will pass through the ordinary garden hose in about five hours.

**Kirke Feeder.** For fertilizer and insecticide cartridges, nickel-plated, complete, each $3.00.

Mulford Cultures

FOR LEGUMES

Inoculate Your Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches, Garden Peas, Beans, and all other legume crops with

Small Cost   Large Returns   Easy to Use   No Labor Expense

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

Mulford Cultures are “different,” and should not be confused with other brands.

Legumes offer the best known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Dept. of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt “catch” and increase your yield.

Mulford Cultures are prepared for:

Alfalfa   Red Clover   Soy Beans   Sweet Peas
(Lucerne) Alsike Clover   Peanuts   Garden Peas
Crimson Clover   Bur Clover   Vetch   Garden Beans
Sweet Clover   Cow Peas   Velvet Beans   Lima Beans

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume. Prices: 5-acre size, $5.00 (A dollar per acre); 1-acre size, $1.50; ¼-acre size, 75c. Small size (supplied only in 4 varieties, for garden Peas, garden Beans, Lima Beans and Sweet Peas), 35c.

HALL’S NICOTINE FUMIGATOR FOR GREENHOUSES

A simple and effective preparation for fumigating greenhouses, for plant lice and thrips. It is a specially prepared tobacco powder, which has been treated to insure proper burning qualities, and which is saturated with pure Nicotine.

Simply fill the enclosed measuring dipper with the fumigator, press it in gently and place on an inverted, empty tin can. Set the can on the floor and light the cone at the top. It will burn evenly, without flaming, and will be consumed in about five minutes, vaporizing the Nicotine. An ordinary greenhouse, 20 by 100 feet, will require three of the above charges—equally spaced—for strong fumigation, or one (1) measureful for each 7000 cubic feet of space. 2½-lb. tin $2.50, 10-lb. tin $8.50.
